

CLASS 1 NEWS

3rd February 2012

This week has been all about our sense of smell. We have had a perfumery in the tuff spot- a very popular activity and as a consequence we have had some fantastic writing (perfume recipes.) We have had blindfolded fruit identification (using smell only) and written descriptive sentences about good and bad smells.

In maths we have been using our number knowledge to solve problems and write them down using coat hangers and pegs!

We have also thoroughly enjoyed exploring the properties of ice! Very exciting! We have explored what speeds up the ice melting, how it feels, what happens if we stand on it and how it affects the cars and ramps!

Finally, thank you so much to everyone who accompanied us on our Class trip last Friday. We had a terrific time learning about lighthouses, shooting a rocket to build a pulley and sending the lighthouse man across the quay to the other side, dark and light and all sorts when exploring the museum. The Chinese meal was also a huge success, the children were brilliantly behaved and tried all the different dishes on offer, I was very proud of them all!
